**TO:** Council Traffic Sub-Committee  
**FROM:** Mitch Wasserman  
**DATE:** October 19, 2016  
**SUBJECT:** October 2016 Traffic Committee Memo

**BACKGROUND:**

Since the last Sub Committee meeting, the staff has been busy working with the ideas previously discussed by the Committee, the ideas generated earlier by the staff for the Committee's consideration and has been working with Traffic Engineer Eric Shimizu from DKS. Eric helped the staff develop a map of current traffic speed/volume information as well as develop and map a more specific management plan for the Committee's review and comment.

A committee member has also shared a set of goals and principles he would like the group to discuss and agree on before going into the details of the staff information and suggestions.

Eric will also be attending this meeting to help interpret the volume/speed information, help answer some of the Committee's technical questions and provide a traffic engineering perspective to the group's overall challenge.
