

Improving your electric reliability

84th Ave NE-area electric service reliability project

July 23, 2021

Dear Puget Sound Energy Customer,

As part of an effort to improve electric service reliability in your neighborhood, PSE is preparing to upgrade the existing electric distribution system along 84th Ave NE in Medina. This work will entail replacing a transmission pole, installing new control panels and upgrading related electric equipment. Please see below for project details.

Project details

- Who:** PSE and Potelco electric crews
- What:** Replacing a transmission pole, installing new control panels and upgrading related electric equipment
- When:** Construction is expected to begin the week of August 9th and last approximately four (4) days
Typical work hours: Monday to Friday, 9 a.m. to 3 p.m.
- Where:** 84th Ave NE in Medina
(please see map on reverse)

What you can expect:

- There will likely be noise from trucks and heavy machinery during working hours
- 84th Ave NE will be reduced down to one lane, likely resulting in traffic delays
 - Traffic control flaggers and signs will guide vehicles and pedestrians safely around the work zone
 - We'll work to maintain access to driveways whenever possible, in coordination with impacted neighbors
- Some street parking will be impacted. "No parking" signs will be placed in the area prior to work beginning
- The sidewalk will be temporarily patched after construction is complete with full restoration taking place at a later date

PSE work amid COVID-19 response

Safety is our top priority. During construction, our crews will follow strict statewide and corporate safety requirements to ensure the health and safety of our customers, employees and service providers. Some of our safety measures include wearing face coverings, maintaining physical distancing, sanitizing and handwashing, and conducting pre-shift health screenings. While our employees will be maintaining social distancing in the field, we encourage our customers to do the same when engaging with our field crews.

Thank you for your patience and understanding. For more information on PSE's COVID-19 response, please visit pse.com/covid19.

We're proud to serve in your community and aim to complete this work with as little disruption as possible. If you have any questions or concerns, please contact me and reference project number **111024970**.

Thank you in advance for your patience and understanding as we work to improve your electric reliability.

Sincerely,
Kye Schidleman | Project Manager
